Junior CNC Machinist/Toolmaker

Basic Job Functions

- Set up and produce prototype quantities of precision parts using CNC mills and lathes as well as manual equipment under the supervision of the Shop Manager or Senior Machinist
- Hand polish, bring into tolerances and perform full part inspection with manual tools and optical comparator
- Operate grinders, sand blaster and other shop equipment
- Adhere to quality and safety standards, keeping records and effectively maintaining equipment
- Participate in product development and production teams

Experience

- 1-2 years of related hands-on experience in a machine shop environment

Education

- A 2 year degree in machining or equivalent and/or vocational training is required

Qualified candidates must be skilled in:

- Operating manual and CNC lathes, mills, and other shop equipment
- Working to close dimensions/tolerances (+/- .0005 and better)
- Finishing and hand-working parts to tight tolerances and high surface finishes
- Full self-inspection of parts
- Thorough understanding of blue print reading and shop math
- Journeyman toolmaking papers a plus

Personal Qualities

- Self starter requiring a minimum amount of supervision
- Detail-oriented in following blueprint requirements
- Good ability to work with others and a genuine interest in being part of a team
- Neat and organized
